**Subject:** Worcester samples

Hi Sharon,

I just went to Worcester, picked up samples, and have finished entering their results for November and December into the computer. Therefore you should be all set for the monthly reports. I might wait a few days to do December just to make sure all of the Boston data is entered as we have had chemists out sick, etc.

Also, I finished the "not tested" vm in November and that number stands at 207 for the November line item. (Glad that's over!)

Happy New Year!!

Betsy
